

BUS ANALYZER CAN FD/HS, LS, LIN MUXTRACE® LITE

Muxtrace® Lite is the new free software tool offered by Exxotest® for the analysis and diagnostics of embedded communication networks.

Combined with the Exxotest® VCI-Muxdiag3 communication interface, it provides trainers, engineers, and technicians with a simple yet powerful solution for working with the latest-generation communication protocols.

Main Features

- Compatibility with CAN FD, CAN HS, and CAN LS networks
- Real-time frame transmission and reception
- Communication recording for offline analysis
- Support for the DoCAN protocol
- DBC database support for simplified signal decoding
- Intuitive interface designed for both educational and diagnostic/validation efficiency

Muxtrace® Lite Advantages

- An accessible and educational solution for training and engineering
- Compatibility with modern network environments (CAN FD, DoCAN)
- Developed and maintained by Exxotest®, a leading player in automotive diagnostics
