

The DTM7030 model is a teaching support intended for studying the basics of electricity applied to the signage and lighting wiring of a trailer.

### FUNCTIONS

- Proceed to a full wiring reconstitution of a complete set of trailer lighting and signage functions.
- Enforce the knowledge of laws of electricity: Ohm, etc.
- Study of different subsets: plug, sockets, lamps, etc.
- Electrical diagram reading and interpretation.

### DESIGN

The set consists of 4 separate units to be wired together to obtain a full operational system as well as an **EXXOTEST®** BM250 trailer plugs wiring controller. The modules can be connected with **DTM7000** modules set and with a real vehicle.

### SPECIFICATIONS

- DTM 7001D : Lighting block trailer right
- DTM 7001G : Lighting block trailer left
- DTM 7031 : Trailer plug, side the car
- DTM 7032 : Trailer plug side the trailer

### EQUIPMENT

Wiring trailer controller M250:

This device is designed to help in wiring installation, check of proper operation and diagnosis of trailer's connection. It allows identifying correctly the wires of a harness.

It consists of a professional controller and its corresponding wiring harness.

### OTHER

- Power supply: 12vDc (not included)
- Size: 400 X 300 X 300 mm (transportation box)
- Gross weight : 5.5 Kg (ready to ship)
- Net weight: 5 Kg
